LTE MiMo INDOOR
УСИЛИТЕЛЬ ИНТЕРНЕТ-СИГНАЛА

* - Internet Amplifier

LTE MiMo INDOOR

УСИЛИТЕЛЬ ИНТЕРНЕТ-СИГНАЛА * - Internet Amplifier

High performance 3G/4G antenna for amplification of mobile Internet signals.

In LTE networks, the antenna allows to implement MIMO (Multiple Input Multiple Output) technology that increases data transfer rate. At that, both specifically oriented antennas are utilized.

LTE MiMO INDOOR

УСИЛИТЕЛЬ ИНТЕРНЕТ-СИГНАЛА * - Internet Amplifier

The antenna demonstrates high gain performance in amplification of mobile signals when using MIMO mode and when the antenna is pointed to the cellular base station.

To the base
station

The antenna has clearly defined pattern, with maximum gain pointed in one direction.

LTE MiMo INDOOR

УСИЛИТЕЛЬ ИНТЕРНЕТ-СИГНАЛА

The antenna is manufactured as TS9 and CRC9 series, depending on jack type used for connection to USB modem antenna sockets.

1.8m USB extension cable is included in the set for comfortable positioning of antenna in location of the best mobile signal reception.

The antenna may be used together with Wi-Fi having sockets for connection of external 3G/4G antennas.

Antenna is packed for delivery in corrugated pasteboard box identified with complete technical data of the product.

Production techniques allow us to manufacture the antenna for different brands.

УСИЛИТЕЛЬ ИНТЕРНЕТ-СИГНАЛА * - Internet Amplifier

Specifications:

Antenna type indoor

Supported communications standards:

LTE, HSPA, HSPA+

Operating frequencies, MHz 790 – 2700

Gain, max., dBi 11

Cable length, m..... 1.8

Impedance, Ohm..... 50

Socket type USB Af

Packing dimensions, mm 285x140x160

Weight, not more than, kg 0.6
